

Re: Search Specialists

TO WHOM IT MAY CONCERN:

As vice president and chief engineer for Continental Machines, Inc. over the past three years, I have had the opportunity to work with Mr. Craig Lindell in the recruitment and hiring of engineering personnel.

Mr. Lindell has always been able to supply viable candidates for each specific requirement in a very timely fashion, several of whom were hired and have been good contributors to our design and testing efforts.

I have found Mr. Lindell to be very aggressive and hardworking in supplying qualified candidates and could recommend him to anyone requiring his services.

Sincerely,

Howard L. Babcock
